

## ALUMINIUM ELECTROLYTIC CAPACITORS

### PG - 6DI with Screw Terminals

PG - 6DI range is designed for high reliability, high frequency and high ripple current applications like high frequency PWM inverters, high KVA on-line UPS systems, telecom SMPS.

- ▶ Small can size
- ▶ Low ESR
- ▶ Low leakage current
- ▶ High ripple current.

### Specifications

- ▶ **Voltage range** : 50 VDC to 500 VDC
- ▶ **Can size** : 35 x 62mm to 90 x 220mm
- ▶ **Operating Temperature range** : -40°C to + 85°C
- ▶ **Capacitance** : 330 MFD to 250000 MFD  
The value of capacitance is given in microfarads, and with a tolerance of ± 20%
- ▶ **Leakage current:** The maximum leakage current (Ir) is given by the formula:  

$$I_r = 0.003 CV \text{ (microamps)}$$
 C = capacitance in microfarads  
 V = DC rated voltage  
 Pre-conditioning of the capacitors, prior to testing for leakage current, is essential (refer to page 5)
- ▶ **Ripple Current:** All capacitors withstand rms ripple current at 100 Hz at 85°C. When capacitors operate at temperatures other than 85°C, the permissible rms ripple current at 85°C should be multiplied by the factors given below

+40°C	+45°C	+50°C	+65°C
2.10	2.00	1.90	1.60

Where capacitors are required to operate at frequencies other than 100 Hz the multiplying factors given below, may be used to determine the ripple current capacity, at that frequency.

Frequency Hz	100	250	500	1k to10k	>10K
Multiplying Factor	1.0	1.05	1.20	1.32	1.35

- ▶ Can is negative, However, it is isolated with a PVC insulating sleeve and polypropylene end-disc.

### Terminal styles

capacitors are available in screw terminals in two can styles

**AEST** -Screw terminals with plain insulated base

**AEST-D** -Screw terminals with stud mounting

*Note : For details of dimensions see page 25*

### Marking on capacitors

Each capacitor will have the following ueinformation printed on it, sequentially:

- 1 . The Company's symbol  followed by the words ALCON ELECTROLYTIC
- 2 . The capacitor grade viz. PG-6DI
- 3 . The capacitance value MFD
- 4 . The rated voltage
- 5 . The surge voltage
- 6 . Capacity tolerance
- 7 . Temperature range
- 8 . Part number on non-standard capacitors
